

15x80 MT-SX - a versatile all-weather binocular

The 15x80 MT-SX is a large aperture binocular which is very well suited for long-range observations and surveillance. The patented Fujinon Electron Beam Coating (EBC) creates an incredibly clear and sharp image even under critical light conditions. With its wide-angle eyepieces extended viewing over long periods is possible without any eyestrain. The horn-shaped eyeguards effectively prevent straylight to come into view. The sealed aluminium body is waterproof according to military specifications, the rugged housing of this binocular allows even extended exposure to salt water. The optional mount can be attached to flat tripod or pillar tops, the integrated mount head and the balanced construction allows very soft and precise target finding and guiding. The 15x80 MT-SX is used by various coast guard units worldwide, besides it is also mounted on many industrial fishing vessels. The binocular is supplied with an aluminium trunk for storage and transportation.
